### Condition Report

A number of claws are showing signs of wear and need to be re-tipped to ensure security of the stones.

Slight wear to the sides of the mount.

Resized in the past, which has cut through the hallmark.

Typical light scratching/wear to the shank.

The two side emeralds have some heavier wear/abrasion, the central emerald less so, but with a surface reaching inclusion to one side of the table. The central emerald with typical inclusions, black in nature. The side stones look to have better clarity.

One diamond with three surface flaws.

Estimations of diamond grading (for guidance only, limited by the setting): colour H/I, clarity SI.
