

Jewellery / Wed, 4th October 2023 / Lot 609

### LOT 609

A gold, aquamarine and diamond cluster ring, claw set with the oval cut aquamarine within a surround of circular cut diamonds, detailed '585', weight 4.9g, ring size approx N1/2.

Estimate: £140 - £180

---

### Condition Report

Aquamarine - has some abrasion to facet edges, the stone has some inclusions, which are long, thin and slightly brown tinted, running parallel to one another across the stone, most obvious when viewed under a 10x loupe and the stone tilted to one side.

Diamonds - have a few inclusions, some of which are surface reaching.

The stones are currently secure in their settings, claws look to be in good condition.

Possibly resized in the past.

There is some splitting to the gold of the mount/decorative cage beneath the stones, this may be a result of manufacture and/or resizing but is noticeable when the ring is viewed from the side.
