

Jewellery / Wed, 24th January 2024 / Lot 540

LOT 540

A diamond pendant brooch with a central cluster between a pair of wings, mounted with variously cut diamonds, unmarked, weight 10.8g, length 4.9cm.

Estimate: £400 - £500

Condition Report

A few diamonds are chipped. A suspension loop directly below the cluster has been bent back underneath the cluster and is stuck in place, it would suggest potentially the piece had a pendant drop which is now lacking. Otherwise the piece appears to be in generally good condition, with typical light surface wear/scratching. Diamond colour H-J, some slight variation, the central cluster brighter and whiter than the sides. SI average clarity.

(Diamond gradings are estimates, limited by the setting)
