

Jewellery / Wed, 21st February 2024 / Lot 741

LOT 741

A gold ring claw set with an oval opal, detailed '18K', weight 3.2g, ring size approx K1/2, with a case.

Estimate: £80 - £120

Condition Report

The opal has been applied with black enamel, evident from the sides. This appears to have been applied after it was mounted, as there are remnants by a claw.

This treatment was likely done to make the opal appear to have a darker body colour than it actually has.
