

Cameras and Scientific Instruments / Thursday, 7th March 2024 / Lot 1313

LOT 1313

A late Victorian lacquered brass binocular microscope by R. & J. Beck of London and Philadelphia, numbered '11449', with rack and pinion focusing, fine focusing, circular stage and mirror, on a triform base, unextended height 39cm, with mahogany travelling case and other accessories, including eyepieces and various slides.

Estimate: £80 - £120

Condition Report

1313. Typical surface scratches and wear to lacquered brass.

The black glass covering the stage is intact, but it does have some craquelure to the black collar.

Rack and pinion focusing functioning well with no missing teeth.
