LOT 757

A 12ct gold, garnet, emerald and green gem set ring, mounted with two heart shaped garnets to the centre, the shank with engraved decoration, partial marks, weight 1.9g, ring size approx K1/2.

Estimate: £150 - £250

Condition Report

Resized in the past, which has cut through part of the hallmark and resulted in some loss of engraved decoration at the back of the shank.

There is the possibility this ring was re-shanked in the past, various join marks to the interior of the shank near the head of the ring on either side.

At least 2 of the green stones have been replaced in the past. A few of the claws are worn, but generally ok. Some abrasion to the stones, one centre green gem is badly chipped.
