

Jewellery / Wednesday, 15th May 2024 / Lot 765

LOT 765

A gold, sapphire and diamond circular cluster ring, claw set with a circular cut sapphire within a surround of old cut diamonds between scroll pierced shoulders, unmarked, weight 2.4g, ring size approx M1/2.

Estimate: £500 - £700

Condition Report

Sapphire approx. 4.3mm diameter, 3.6mm depth

Total diamond weight approx. 0.400-0.50ct

We have not tested the gold, the colour would suggest higher grade.

The sapphire is natural but we can't confirm it has not been treated to enhance colour/clarity.

Some abrasion to the facet edges of the sapphire.

Minor scratching/scuffing to the shank setting, the shank is a little thin but evenly worn.

One claw securing a diamond would need re-tipping.
