Condition Report

The top rim edge has a polished section approx 4cm long, noticeable by the very slight unevenness and unsmooth finish when viewed under a strong light. In addition there are two small flea bites to the top rim edge, one to the interior and one to the exterior - I would suggest each of these could be improved visually. One foot has two tiny nicks, one foot has one tiny nicks and there are some teeny tiny nibbles to the other feet.
