LOT 822

A sterling silver, smoky quartz and rutilated rock crystal pendant necklace, the front mounted with a sterling silver pendant of abstract form, detailed 'Sterling Finland Lapponia Bjorn', otherwise mounted with rough cubes of smoky quartz alternating with spherical rutilated rock crystal beads, on a sprung hook shaped clasp, length 64.5cm.

Estimate: £200 - £300

Condition Report

In generally good condition overall.

A couple of small dents to the bottom edge of the pendant. Due to the rough nature of the smoky quartz, there are to be expected various surface chips, surface reaching inclusions and the odd bruise.

Spherical beads look to be in fairly good order, though they are not individually knotted and can knock against the smoky quartz.

We believe the pendant may be in association with the necklace. The sprung hook shaped clasp is not marked and does not appear to be of the same quality as the pendant.
