

Asian and Islamic Ceramics and Works of Art / Thu, 21st November 2024 / Lot 1081

## LOT 1081

A Burmese bronze rain drum, probably late 19th century, with verdigris patination, the circular top cast with central star motif and concentric geometric bands, the edge ornamented with four stacked frog finials, the sides similarly decorated in relief with geometric bands, opposing two leaf motifs and two graduated elephant processions beneath a pair of double strap handles, height 45.5cm, diameter of top 56.8cm.

Estimate: £150 - £250

---

## Condition Report

1081. Very much as it looks in the online images, so in generally good sound condition with a verdigris patination. One frog missing to one finial on top, possibly a small repair to lower rim but could be in the manufacture. Typical surface scratches and wear.
