

Jewellery / Wed, 27th November 2024 / Lot 523

LOT 523

A single row necklace of cultured pearls on a gold and cultured pearl cluster clasp, detailed '9ct', length 86cm, with a case.

Estimate: £40 - £60

Condition Report

The pearls generally have natural surface pitting/imperfections which occurred during the growth process. One or two are starting to peel, particularly one on one side of the clasp, which is showing down to the mother-of-pearl bead.

The pearls are of a creamy lustre, but would benefit from a clean. They are individually knotted but there is some movement at the clasp end, so re-stringing would be advisable.

Clasp in working order.

Diameter range of pearls approx. 6.7mm-6.9mm
