## Condition Report

A very narrow, short chip to the outer edge of the foot, alongside some impact bruising to the top edge of the foot - both only noticeable on closer inspection.

One of the birds towards the middle of the vase has a minuscule nick to the side edge of its tail.

There is a minor abrasion to the outer edge of the neck rim, again only noticeable on closer inspection.

There is a pinhead sized bruise to the middle of the vase between the birds, again only noticeable on close inspection.

These are all quite little 'picky' issues, overall the vase displays well.
