Vase incised with deer - professional restoration to neck rim, only really noticeable by a trained eye as the crazing disappears in this area.

Jug incised with tulips - in good condition overall with no cracks, chips or restoration, typical crazing to the glaze.

Banded coffee set - overall crazing to the glaze, tiny chip to tip of coffee pot's spout, otherwise in good condition with no damage or repairs.

Blue glazed jug - crazed but ok.

Miniature set - some light crazing but otherwise ok.

Lamp base - some light surface scratches but otherwise ok.

Green incised plate - crazed but ok.

Cruet set - badly chipped stand and other small chips.

4 pieces with polychrome flowers - light crazing but ok.

Pair tureens and covers - some crazing but ok.

Remaining tableware items have obviously been used and have varying degrees of wear, crazing and small chips overall.
