LOT 2087

A late 19th century Swiss carved walnut child's chair, the hinged back and seat enclosing a musical movement, height 65cm, width 28cm.

Estimate: £100 - £150

Condition Report

2087. Small split to top scroll of back. Some slight woodworm to underside of seat and left side seat rail. The main issue is that the seat panel is warped and does not sit flat to the seat rails. The musical movement is very dirty, but is currently working.
